

Lineman's Skinning Knife, Insulated

The exclusive design features dual-layer insulation for safety. The high-dielectric white inner layer is bonded to the tool while the outer orange layer is flame retardant and serves as a visual warning if the tool has been compromised. The insulated handle is molded for comfort and also features marks on the back to help measure the stripping length of wire. The blade is made of stainless steel for durability and corrosion resistance.

Specifications

Application:	Cable Scoring and Cutting	Special Features:	Measuring Marks on Handle
Blade Length:	2.375" (6 cm)	Overall Length:	8.75" (22.2 cm)
Blade Material:	1095 Steel	Handle Color:	Orange
Handle Material:	High-Dielectric Plastic	Handle Finish:	2-Layer Insulation
Insulated:	Yes	Standard:	ASTM F1505-10, IEC 60900:2012, CAN/ULc-60900-09, NFPA-70E, 2012 Ed. CSA Z462-08
Weight:	5.6 oz (159 g)
