

## Digital Tracing Probe

Use the Klein Tools Digital Tracing Probe to trace cables and wires on active and non-active networks when used with the Digital Tone Generator (Cat. No. VDV500-163; sold separately). It features a responsive, durable, replaceable non-metallic, conductive tip and a work light for use in dark spaces. A headphone jack allows for headphone (not included) use in extreme noise environments.

### Specifications

|                                |                                  |                         |                                  |
|--------------------------------|----------------------------------|-------------------------|----------------------------------|
| Type:                          | Digital Wire Tracing             | Application:            | Wire Tracing                     |
| Special Features:              | Work Light, Stay On Power Button | Material:               | ABS                              |
| Batteries:                     | 4 x AAA                          | Battery Life:           | 20 hr                            |
| Low Battery Indicator:         | Yes                              | Power On LED Indicator: | Yes                              |
| Auto-Power Off:                | Yes                              | Adjustable Volume:      | Yes                              |
| Amplifier Overload Indication: | No                               | Continuity Testing:     | No                               |
| Visual Notification:           | LED                              | Replaceable Tip:        | Yes                              |
| Self-Storing Remote:           | No                               | Included:               | Tracing Probe; 4 x AAA Batteries |
| Overall Length:                | 1.9" (4.8 cm)                    | Overall Height:         | 9.9" (25.1 cm)                   |
| Overall Width:                 | 1.3" (3.3)                       | Weight:                 | 5.2 oz (147 g)                   |
