

Dexterity® | S18TAFGFNF

Ultra-thin cut resistance with palm coating that covers fingers and knuckles for better water protection

ABOUT THE PRODUCT

Our versatile Dexterity® S18TAFGFNF gloves are ultra-thin with an extended foam nitrile coating that covers fingers up to the knuckles for additional protection in wet conditions. Made from static dissipative TenActiv™ engineered yarn to protect microelectronics, they provide 360° cut protection with moderate ANSI A4 cut resistance while the 3/4 foam nitrile coating offers steady wet grip. The ultra-thin construction improves hand movement while providing a bare hand feel.
