((SURFOX MAX) NG10/100A INVERTER BOARD

Please, see page 9 for this item.

Devices with serial numbers ranging **from 96.001 to 96.128**,
were built using the following V1 electronic components.

	WT Code	Description
V1 → A	48R715	S.MAX (V1) CONTROL PANEL BOARD + 4 WIRE CABLE
V1 → B	48R680	4-WIRE CONNECTION CABLE
V1 → C	48R718 DISCONTINUED	NG10/100A_V1 INVERTER BOARD

The NG10/100A_V1 inverter board (part no. **48R718**) is no longer available. While the control panel and connection cable are still available for repair purposes, replacing the inverter board requires the purchase of the new V2 model.

Crucially, replacing the inverter board also necessitates replacing the control panel and connection cable to maintain electronic compatibility.

To facilitate this operation, Nitty Gritty provides a special kit (48R756) that includes all three new components (V2).

	WT Code	Description
V2 →	48R756	NG10/100A_V2 COMPLETE ELECTRONIC KIT

NOTE: if further repairs are required and it becomes necessary to replace the electronic components of the installed V2 kit (48R756), please refer to the part numbers listed below.

Devices with serial numbers **≥ 96.129**, were built using the following V2 electronic components.

	WT Code	Description
V2 → A	48R757	S.MAX (V2) CONTROL PANEL BOARD + 3 WIRE CABLE
V2 → B	48R737	3-WIRE CONNECTION CABLE
V2 → C	48R758	NG10/100A_V2 INVERTER BOARD
